Qualifications Desired: What we require of you: •Must be minimum of 18 years of age •Valid driver's license in good standing •Access to a registered vehicle with proof of insurance •Successful clearance of background checks

Education Requirement: High school diploma or GED

Job Duties: Come join REM Ohio in the very important work we do supporting individuals with intellectual disabilities, brain injury and emotional, behavioral or medical complexities. Our team is fun, creative, and dedicated to making a difference every day in the lives of the people we serve. As a Direct Support Professional/DSP (Caregiver), you'll carry out rewarding work, playing an integral and crucial role in the success of our organization. Based in community settings, DSPs provide assistance with daily activities such as meal preparation, personal hygiene, and medication administration. Our Caregivers may also facilitate community involvement by accompanying individuals on outings in the community or providing transportation to work or other activities. In addition, DSPs partner with clinical staff to support the therapeutic and behavioral plans in place. Our Direct Care providers are the most exemplary reflections of the wonderful mission driven work we do here every day. At the end of your work day, you know you have made a difference in someone's life. Whether you have previous experience in a role like this, or this just sounds like the type of impact you want to make... we want to hear from you! Bring the right attitude, we'll train you for success!

Education Requirement: Associates Degree in Science or course work in microbiology or equivalent work experience

Job Duties: We are looking for a self-sufficient candidate with quality lab experience. Have you wanted to be a member of a team of highly technical resources in the food manufacturing industry? This may be the role you've been waiting for. IN THIS ROLE YOU WILL BE ACCOUNTABLE FOR: Lab Area, perform analysis according to plan of control, and record information to assure that finished goods and in-process samples are in compliance to all specifications. Place finished product on "HOLD" status when results fall outside of acceptable range, investigate potential causes and propose solutions. Assist in disposition of hold products through retest or providing sorting instructions to production. Perform bench-work analysis according to SOP's and standard methods. Enter analysis results into database and analyze recorded information to determine any trends. Perform required environmental tests of Primary & Secondary Fluids as well as Air Quality. Perform audits on equipment, materials, products and procedures to assure that the lab is in compliance based on CQA (Corporate Quality Assurance) and HACCP (Hazard Analysis Critical Control Points) procedures. Maintain the laboratory in a clean, safe and orderly manner on a daily basis. Constantly look for ways to continuously improve lab methods for both speed and effectiveness and eliminate waste while improving product quality. Production Area: Conduct daily line tours and filler line audits to ensure machine compliance with site quality standards. Audits should encompass various areas including startup, changeover, tank change, intervention and normal production where technician will evaluate potential risks to product quality and support resolution of problems. Provide constant and consistent quality leadership to production operators, looking for ways to improve product quality and increase technician understanding of key quality criteria and their impact on it. Support continuous improvement initiatives in all areas of the plant. Train others in Quality-related practices and any other duties assigned by Supervisor.
