

# **FORT LORAMIE WASTEWATER TREATMENT PLANT OPEN HOUSE**

**JULY 18, 2024 3:30 PM - 6:00 PM  
3475 CANAL ROAD #1  
MINSTER, OH 45865**

- **After five years of planning and construction, a major upgrade to the Fort Loramie WasteWater Treatment Plant is complete, with the work done by Peterson Construction. The treatment plant was first constructed in 1990 and it was decided that it had reached the end of its useful life.**
- **The \$11.8 million dollar joint project with the Village of Fort Loramie was funded through support with loans and grants from the Ohio Department of Development and USDA's Office of Rural Development.**
- **The Facility currently treats waste from Fort Loramie Lake residents, the Villages of Fort Loramie and Kettlersville along with areas of Newport and McCartyville. Serving approximately 4000 people.**
- **The updated facility has increased capacity from 400,000 gallons per day to 600,000 gallons per day and can withstand peak flow up to 3 million gallons per day.**
- **These improvements allow the County to be compliant with the Ohio EPA standards pertaining to phosphorus and ammonia. This will also increase the capacity to handle wastewater solids.**
